PROFESSIONAL SUMMARY

Software Developer with **3.5 years of experience** building scalable **React** and **TypeScript** applications across **e-commerce, enterprise SaaS, and Web3** platforms. Experienced in shipping production features, debugging complex asynchronous UI behavior, optimizing application performance, and maintaining business-critical systems in large engineering environments.

PROFESSIONAL EXPERIENCE

Flipkart via Sketch

Software Developer

Nov 2025 - Jun 2026

Bangalore, India

- Delivered the **Co-Invest** feature for **Flipkart Ads** using **React**, **TypeScript**, and **GraphQL**, enabling advertisers to launch, manage, and monitor campaign ROI across a production advertising platform supporting **thousands of brands**.
- Resolved a critical production issue in Flipkart's in-house **Sleek UI** notification framework by replacing timeout-driven loader behavior with request lifecycle-based state management, preventing premature UI state transitions during asynchronous API operations.
- Diagnosed and fixed inconsistent campaign planning data in the **Keyword Planner** module by identifying undefined state propagation in dynamic React table rendering, improving workflow reliability.
- Participated in a **2-week production on-call rotation**, investigating high-priority UI issues through browser debugging, API analysis, and cross-functional collaboration to restore production stability.
- Investigated production regressions across React and GraphQL data flows, validated frontend changes, and collaborated with backend and QA teams to deliver stable, production-ready feature releases.

Octopus Technologies

Software Developer

Apr 2025 - Nov 2025

Surat, India

- Redesigned an incident management dashboard processing over **5,000 incidents**, reducing average page load time from approximately **4 seconds to 1 second** through frontend performance optimizations.
- Automated incident assignment, resolution, and reassignment workflows, reducing repetitive manual effort and standardizing operational processes across support teams.
- Implemented **Auth0** authentication with **Multi-Factor Authentication (MFA)** and **Role-Based Access Control (RBAC)** to secure enterprise dashboard access.
- Integrated REST APIs, investigated production defects, and collaborated with backend engineers to deliver stable incremental feature releases.

Open Investment

Software Developer

May 2023 - Apr 2025

Remote

- Developed and maintained a blockchain-based trading platform using **React**, **TypeScript**, **ethers.js**, and **Solidity**, enabling secure digital asset transactions.
- Integrated **MetaMask** wallet connectivity supporting transaction signing, network switching, gas estimation, and real-time transaction lifecycle updates.
- Developed and deployed **20+ Solidity smart contracts** with automated testing using **Mocha** and **Chai**, supporting secure fractional trading workflows.
- Collaborated with smart contract engineers to investigate transaction failures, improve blockchain interaction reliability, and enhance user experience.

PROJECTS

TrackWise

Personal Project

- Built a full-stack finance platform using **Next.js**, **React**, **TypeScript**, **Tailwind CSS**, **Clerk Authentication**, **Inngest**, and **ShadCN UI**.
- Implemented recurring transaction scheduling using **Inngest** background jobs for automated monthly financial tracking.
- Designed an interactive analytics dashboard with categorized spending insights and real-time financial summaries.
- Integrated **AI-powered receipt parsing** to automatically generate structured expense records.

TECHNICAL SKILLS

- Frontend:** React.js, Next.js, React Native, JavaScript (ES6+), TypeScript, Redux Toolkit, ShadCN, Tailwind CSS, Bootstrap, HTML5, CSS3, GraphQL
- UI/UX & Optimization:** Responsive Mobile-First Design, Component-Driven Architecture, Performance Optimization
- Backend & Databases:** Node.js, Express.js, MongoDB, REST APIs, JWT/OAuth, WebSockets
- Testing:** Jest, React Testing Library, Mocha, Chai
- Version Control & Collaboration:** Git, GitHub, Agile/Scrum, Jira, Confluence

EDUCATION

Savitribai Phule Pune University

Bachelor of Computer Applications

Aug 2021 - May 2024

Pune, India

- GPA:** 8.0/10.0
